This is the first year we've made calls for access for roads work and I think the script will be a little different than the usual monitoring call. I thought Steve had been doing some calls lately but just talked to Kristy and she wasn't sure. I'll chat with Jim and see what he's doing for the Boulder.

Have you seen the draft SAP WET put together for roads assessment? It shows more than 20 private road crossings and also no sites on Bear Creek, which is where I'm pretty sure we added one. So, it seems like the changes you made weren't updated. It doesn't seem like there would be that many private road crossings.

Possibly. I'm busy but not slammed. I'm not familiar with the script for these access requests, so it's hard for me to estimate how much time it would take me. 20+ landowners?

Hi,

Do you have time to make some calls to landowners for the roads assessment in the Lower Gallatin? They're planning the field work for the week of the 23rd so it would need to be done over the next two weeks.
